

# РЕАБІЛІТАЦІЙНЕ ВІДДІЛЕННЯ В ЗОЛОТОНІСЬКІЙ ЦЕНТРАЛЬНІЙ ЛІКАРНІ / REHABILITATION DEPARTMENT AT THE ZOLOTONOSHA CENTRAL HOSPITAL

At the end of 2023, a project was developed to overhaul part of the children's hospital at 32B Bakha Street in Zolotonosha, namely part of the 1st and 2nd floors for a 30-bed rehabilitation unit.

The area of the rehabilitation unit will be 1246.42 square meters. The department will have wards with separate bathrooms and showers, which will be fully adapted for people with reduced mobility in accordance with modern requirements, with individual wardrobes for each patient. The placement of technical equipment and medical devices will ensure the most comfortable stay of patients in these wards and create the best conditions for medical care.

The project provides for:

- replacement of all communications within the 1st and 2nd floors (water supply, sewage, heat supply, electricity supply networks);
- new finishing of walls, window and door slopes, and flooring;
- creation of appropriate “patient routes” with appropriate visual and tactile markings, information signs, etc.

The gyms will be equipped with equipment:

- Bars with obstacles to restore gait.
- Stairs
- Rehabilitation exercise bike.
- Rehabilitation treadmill.
- Swedish wall.
- An exercise machine for increasing the range of motion.
- Orthopedic verticalizer.
- Orbitrek with a dosed load.
- Equipment for grasping, pulling, and dressing devices.
- Equipment for occupational therapists (kitchen equipment, doors with locks and keys, etc.).

The hospital is reconstructing the premises at the expense of the city budget and sponsors, with the project costing UAH 18.9 million to date.

All of the above equipment and 30 specialized functional beds need to be purchased.

## OUTPATIENT REHABILITATION DEPARTMENT

To further rehabilitate the military and sick residents of the community, it was decided to organize two departments - medical and social rehabilitation of outpatient and inpatient services at the Center for Social Services of the Zolotonosha City Council.

The outpatient rehabilitation department has been formed and is already successfully operating. There are 3 teams of 2 rehabilitation specialists who provide services to patients for 15 to 21 days, depending on the prescription of doctors. The outpatient rehabilitation department can provide services to 30 patients per month.

## INPATIENT DEPARTMENT

An inpatient unit with 10 beds is in the process of being built. The budget of the Zolotonosha community allocated UAH 4 million for all construction works on reconstruction and major repairs. The equipment was supplied in cooperation with the Vlyakh Charitable Foundation. But for successful work we need, especially for the inpatient department, to purchase a professional machine for drying at least 11 kg of laundry. And given the constant shelling, destruction of power supply networks, rolling and emergency power outages, it is extremely necessary to purchase a generator (diesel, gasoline) of 36 kW or more.
